Defendant Tracey Turner's response to the United State's Response
to my Motion for Compassionate Release

I. Medical Circumstances

- a. Would not have gone blind in left eye had I received proper and timely medical treatment.
- b. Have not had any medical treatment for prostate cancer.
- c. The BOP (Federal Bureau of Prisons) has, for years, been incapable of properly treating inmates diagnosed with cancer. Please see enclosed newsletters, highlighted sections. Newsletters are from qualified sources.
- d. It is my informed opinion, due to facts provided, that it is unfavorable, and perhaps lethal, for me to remain incarcerated in any BOP facility, medical or otherwise. I deem this to be an extraordinary and compelling reason; having been diagnosed with prostate cancer and being incarcerated in a BOP facility.

II. At this time I'm currently reviewing my mother's care given circumstances and will address it shortly.

III. As for the Factors That Weigh Against My Release.

- a. Other than a minor, non-violent, non drug related incident several years ago in a non BOP facility; I have not had any disciplinary action taken against me. I am a changed and better human being.

Please reconsider your decision and grant my request. Thank You

Tracey Turner
